

The Same Barrel — risk exhibits

A · Trade statistics, monthly

Rebalances (months)	183
Winning months	58%
Average winning month	+4.78%
Average losing month	-3.49%
Win / loss ratio	1.37
Profit factor	1.89
Annual return, gross of cost	+16.10%
Annual return, net of cost	+15.61%
Cost as share of gross profit	3.0%
Annualised volatility	19.1%
Sharpe ratio, net	0.82
Maximum drawdown	-27.9%
Longest drawdown (months)	39
Best month / worst month	+17.5% / -15.0%
Contracts traded per month	23
Days holding a position	94%

B · Drawdowns the strategy could have produced

Monthly returns of the tranced strategy, net of three basis points per side. Blocks of six months are resampled with replacement so that runs of consecutive losses survive into the simulated paths; reshuffling months independently would destroy that clustering and understate the drawdowns actually possible.
